myfiles.io pages tour

All pages outside of mobile contain transitions to Navbar Pages as well as Sidebar Pages. Listed in order are the pages for Navbar, Sidebar, and Mobile as they appear on myfiles.io.

Navbar Page Transitions

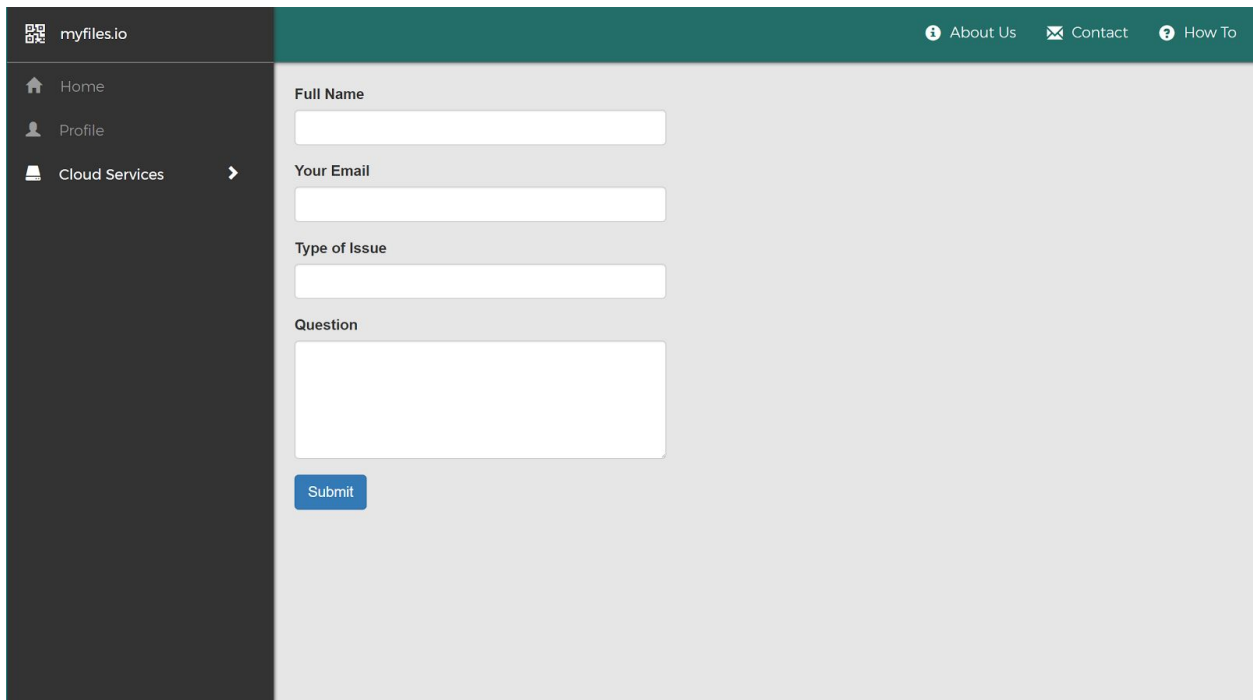

1.) About Us

A brief description of our team, Team Nectarine, and a list of its members for people to read up on who made myfiles.io.

2.) Contact

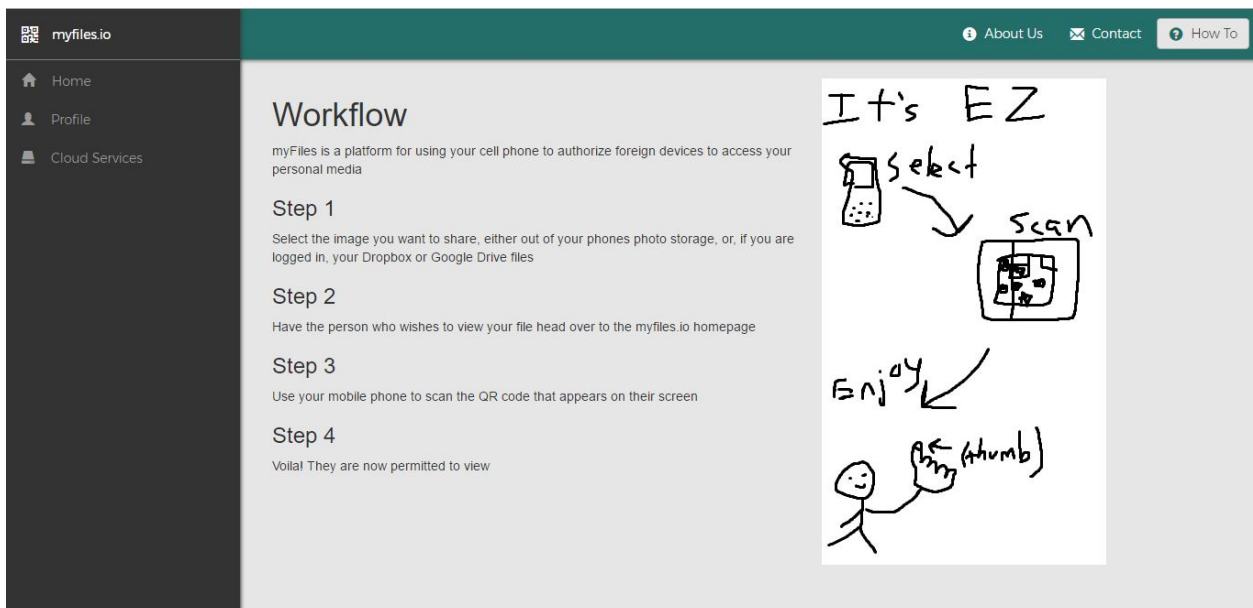

The contact page allows a person to contact the dev team in the case of issues or to ask questions.

The screenshot shows the 'Contact' page of the myfiles.io website. The page has a dark green header with the myfiles.io logo on the left and navigation links 'About Us', 'Contact', and 'How To' on the right. A dark sidebar on the left contains links for 'Home', 'Profile', and 'Cloud Services'. The main content area is light gray and contains a contact form with the following fields: 'Full Name', 'Your Email', 'Type of Issue', and 'Question'. A blue 'Submit' button is located at the bottom of the form.

3.) How To

This page provides proper instructions and guidelines on how to use myfiles.io to the user. A picture is also provided for those who prefer visual instructions.

The screenshot shows the 'How To' page of the myfiles.io website. The page has the same header and sidebar as the contact page. The main content area is light gray and features a 'Workflow' section with the following text: 'myFiles is a platform for using your cell phone to authorize foreign devices to access your personal media'. Below this, there are four steps: 'Step 1: Select the image you want to share, either out of your phones photo storage, or, if you are logged in, your Dropbox or Google Drive files', 'Step 2: Have the person who wishes to view your file head over to the myfiles.io homepage', 'Step 3: Use your mobile phone to scan the QR code that appears on their screen', and 'Step 4: Voila! They are now permitted to view'. To the right of the text is a hand-drawn diagram titled 'It's EZ' that illustrates the process: a phone is used to 'select' a photo, which is then 'scanned' by another phone, and the user is instructed to 'Enjoy' and 'thumbs up'.

Sidebar Page Transitions

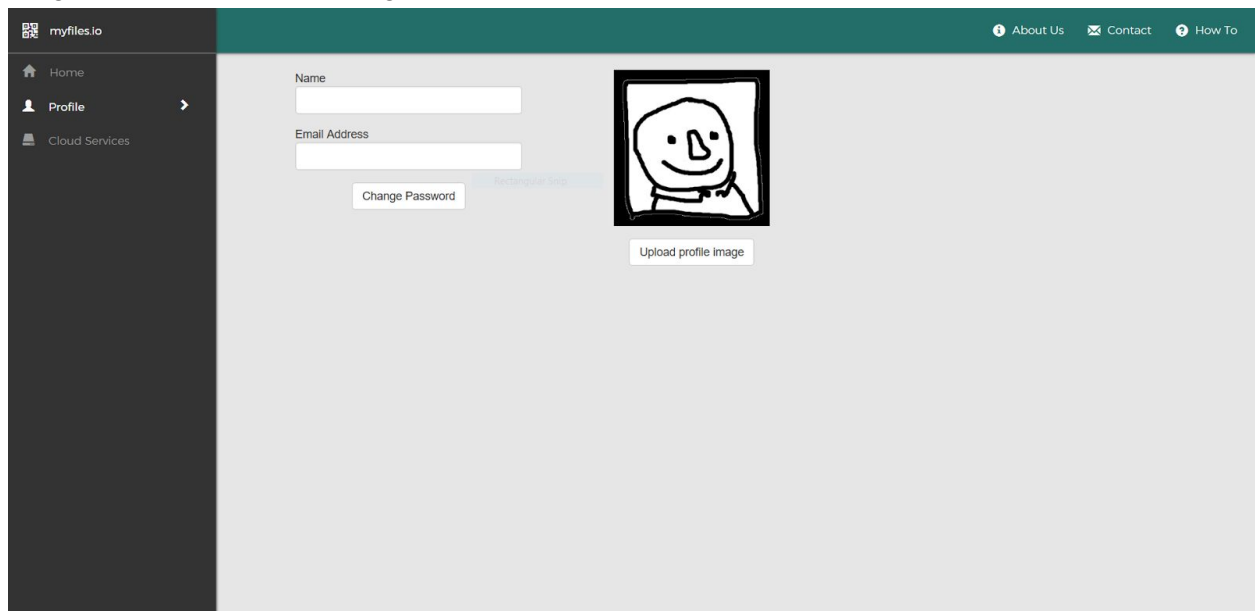

4.) Home

The homepage of myfiles.io that contains the QR code for the user to scan.

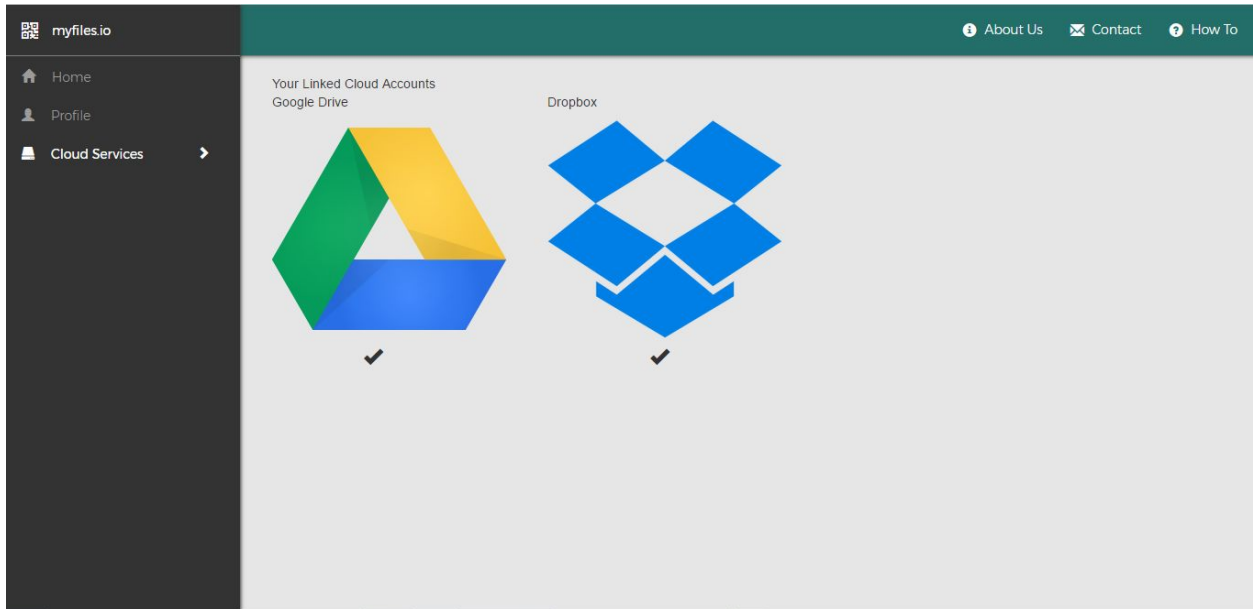

5.) Profile

The profile page contains the user's information such as name and email address, their profile image and the option to change password.

6.) Cloud Services

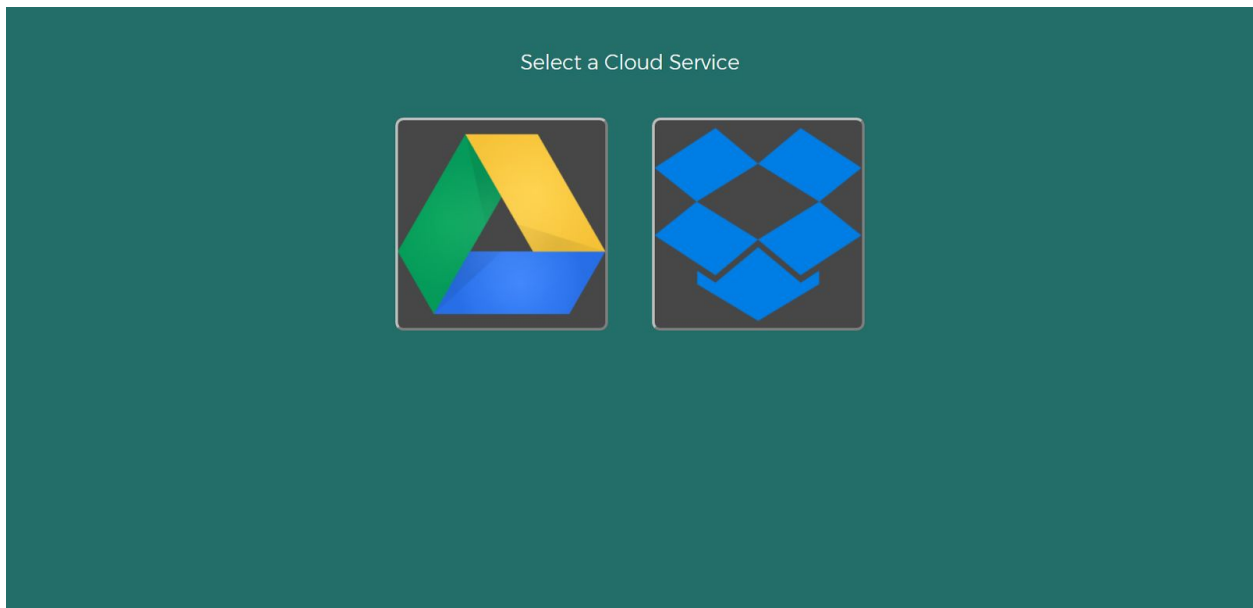

This page displays whether or not the user is linked to another Google Drive or Dropbox account, with a check for a link and an X for no link. Myfiles.io allows the user to link cloud services to be used.

Mobile Page

1.) Mobile Cloud Services

Screen for selecting your cloud service on a mobile device. This brings you to the respective file system, which allows you to share a file by scanning the QR code located on the home page.

Pages Startup Founders Worked On

Harsh Poddar - Sidebar, home

Jackie Wang - user_cloud_services

Brian Gregg - Navbar, mobile_cloud_services

Matthew Hinsley - help

Ryan Fleischer - user_profile

Cameron Pavao - contact, about
